

How to Connect To NWICC Wireless Network

1. Click on the AirPort wireless icon in the right top side of your menu bar (circled in white)

2. Next select a wireless network to connect to by clicking on the network. Please note, the wireless networks on campus follow the following naming convention: *AP* followed by a *numeral*. Example: AP0
3. A check mark next to the wireless network and having the AirPort wireless icon with dark bars means you should now be connected to the wireless network on campus. If you receive an error message or have issues connecting to a specific wireless network, try the above steps with another wireless network.
