CNC PROGRAMMER - **SHELDON**  
QA TECHNICIAN – DAY & NIGHT SHIFT – **SPIRIT LAKE**  
MAINTENANCE TECHNICIAN – DAY & NIGHT SHIFTS – **SHELDON & SPIRIT LAKE**  
PRODUCTION SUPERVISOR – NIGHT SHIFT – **SPIRIT LAKE & SHELDON**  
PROCESS ENGINEER – **SHELDON & SPIRIT LAKE**

**Description:**

**CNC Lathe Setup & Support** – Performing set ups and operations on CNC machines and machining centers.

**CNC Programmer** – Implementation of Edgcam Programming and Program creation. Responsibilities include, but are not limited to: work with Engineering, CNC and Scheduling to write and update programs for CNC machinery, assist in shop floor training for CNC operators, and improve efficiency in the machining process. Specific preferred skills include: 3D Modeling and Edgcam Training or related experience, and Edgcam Implementation experience preferred.

**QA Technician** – Verifies conformance of machined parts, workpieces, tools, machines, assemblies, and finished products to specifications required in accordance with inspection procedures to ensure unit conforms to specifications or to determine the cause of unit failure. Responsibilities include but are not limited to: testing parts, machines, assemblies, and finished product, comparing results of the test to the product or machine specification, determining cause of unit failure, and communicates with others about rework.

**Maintenance Technician** – Sets up, repairs, and maintains machines and equipment. Responsibilities include: set up and operation of machine tools for repairs, troubleshooting equipment to diagnose problems, repairing and maintaining equipment as necessary, and testing for correct operation of equipment.

**Production Supervisor** – Providing daily and consistent leadership in the promotion and realization of RMT, Inc. goals. Job responsibilities include, but are not limited to: providing leadership, representing RMT, Inc., supervision and coordinating activities of workers engaged in the manufacturing process, demonstrates commitment to employee growth and achievement, and oversees product quality.

**Process Engineer** – Evaluates and makes recommendations specific to integrated production systems for managing industrial production processes including human work factors, quality control, inventory control, logistics and material flow, cost analysis, and production coordination. All responsibilities of this position are carried out to meet the goals of providing a safe, clean and efficient work environment, cost/production efficiency and measurably increased product output.

**Salary/Benefits:** Rosenboom offers an excellent benefits package.
